4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where an SI cannot be obtained from leading species, where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. recent cut, burn, etc. Estimated SI is based on site series (ecosystem). Associated fields in the data base are Inventory Type Group and SI Estimated source code.
