4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown either as + or minus the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young stands (<40yrs). It is identified by a slash which always precedes it. An estimated SI is stored in the data base as Inventory Type Group and SI estimated source code.
