**4d SITE INDEX**

All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant and co-dominant SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

**4e ESTIMATED SITE INDEX**

SI is estimated when suitable SI trees aremot present, e.g. young stands (<30yrs). It is denoted by a stash which always follows the estimated value in the data base are Inventory Type Group and SI Estimated source code.
