4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where an estimate of age is made (i.e. 50 years breast height), that age should not be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. Alpine, Parkland, Non-Forest, etc. Site Index Adjustment which always provides A Associated fields in the data base are inventory Type Group and SI Estimated source code.
