4d SITE INDEX

50 SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the Leading Species (Type Group) in the Dominant Stratum. When age and height, estimated SI is known after or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young stands (<30yrs); it is denoted by a slash which always precedes the estimated value. SI values are Inventory Type Group and SI Estimated source code.
