4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Breast Height Age. All stand site index values are based on the leading species , when an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees almost present, e.g. adjacent polygons. Site Index Source is the data base which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
