4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI is shown for the species listed as the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. recently logged areas. The species code for the estimated site index precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
