4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Breast Height Age (BHA). SI is derived from site curves for leading species. When an accurate SI cannot be calculated from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. Deciduous, Immature, Overmature, Juvenile, Krummholz which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
