4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. For SI estimated from stands less than 50 years of age, or from an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. recently logged, burned, or slashed. Any slash which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
