4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. If the SI is estimated from a single tree or stand boring, or from an old cut stump SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arend present; e.g. immature stands, cut-over, burn, or where a stand which always provides it. Associated fields in the data base are inventory Type Group and SI Estimated source code.
