4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI tree asknot present, e.g. young stands (<30yrs). SI is denoted by a slash which always precedes it. Ecological Units in the data base and Inventory Type Group and SI Estimated source code.
