4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. The species is the same as the species leading symbol. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, eg. young stands, recent cut. The SI is the same as the species leading symbol. If associated fields in the data base are Inventory Type Group and SI Estimated source code.
