4d SITE INDEX
All SI are shown for the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant and co-dominant trees. SI is shown after estimated age and height; estimated SI is shown after an explains the SI.

4e: ESTIMATED SITE INDEX
SI is estimated when suitable trees are not present, e.g. young stands (<30y/o). It is denoted by a slash which always precedes the estimated SI. Estimated SI codes are inventory Type Group and SI Estimated source codes.
