4d SITE INDEX
All SI are known to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the Leading Species (Species 1) in the main stand. Inventory type age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX
SI is estimated when subtitle E lines are not present, e.g., young stands (<30yrs). It is denoted by a seedling symbol. Estimated SI is based on the Leading Species in the Inventory Type Group and SI Estimated source code.
