4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years. Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after a colon(:) where the SI is.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. young stands (<30yrs). It is denoted by a dash which divides two numbers between which the site index value are inventory Type Group and SI Estimated source code.
