4b SITE INDEX

Site index is the height in the reference period, at 50 years breast height age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or instead of, the SI.

4c. HEIGHT CLASS

CODE	LIMITS (metres)
1	0.1 - 10.4

4e. ESTIMATED SITE INDEX

SI is estimated when available SI trees almost present, e.g. young stands (<10yrs). e is denoted by a slash which always precedes it. Associated Note in the data base are Inventory Type Group and SI Estimate source code.
