**4d SITE INDEX**

All SI are shown to the nearest metre wherever at 50 years Breast Height Age. SI is based on the age and height of the dominant trees. Site index curves are available for combinations of age and height addressed in SI to show site, or replaces the SI.

**4e. ESTIMATED SITE INDEX**

SI is estimated when suitable SI trees aren't present, e.g. young stands (<30yrs). It is denoted by a slash which always follows the SI number (example 20/ or 20/5). Refer to inventory. *Type Group and SI Estimated source code.
