4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI is usually derived from the dominant leading species. Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young stands. The SI source code is a three digit code which always provides 9 Associated fields in the data base as Inventory Type Group and SI Estimated source code.
