4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant layer. Where the age and height are derived from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees aremot present, e.g. young stands (<30/yrs). It is denoted by a slash which always precedes the SI. Estimated SI values will replace any Inventory Type Group and SI Estimated source code.
