4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years
Breast Height Age (BHA) and are derived from the dominant leading species. When an accurate SI cannot be derived from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees aremit present, e.g. immature stands. The SI source code is the SI source which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
