4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. The species code is the species of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young stands, deciduous stands, or stands in which site trees provides it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
