**4d SITE INDEX**

All SI are shown to the nearest metre referenced at 50 years except for Douglas Fir which is referenced at 100 years. Where leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

**4e ESTIMATED SITE INDEX**

SI is estimated when suitable SI trees aremot present; e.g. Immature stands. The SI is for the leading species. Each leading species provides it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
