4d SITE INDEX
50 SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant and co-dominant trees. Where both inventory label age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees arenot present; e.g. young stands (<50yrs). It is denoted by a slash which always precedes the estimated site index. Species are Inventory Type Group and SI Estimated source code.
