4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast Height Age. SI is based on the dominant height of the leading species. Information sources can be obtained from age and height estimates/SI is known other, or replace the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees aremot present, e.g. recently logged areas. The SI source is the data base which always provides the Ministry's SI for the data base are Inventory Type Group and SI Estimated source code.
