4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. 'SI' is based on the age and height of the dominant layer. Site index is not applicable where the relation age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees arenot present; e.g. young stands (<40yrs). It is denoted by a slash which always follows the estimated site index. The codes are Inventory Type Group and SI Estimated source code.
