4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Site index is not valid for stands with a leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees exend present, e.g. Immature, Veteran, Open grown, Deciduous stands where always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
