4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years.
Site Index curves are based on Height (m) and Age (50 years breaking species. Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when subplots SI was cannot present, e.g. young stands (<30yrs). SI is denoted by a slash which always precedes it Associated fields in the data base are Inventory Type Group and SI Estimated source code.
