4d. SITE INDEX

All SI are unknown & site meas/estimate referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. Where an accurate SI is errorr/ce obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. young stands (<30yrs). It is denoted by a slash which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
