4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained the age and height estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. recently logged, burned, or non-forested. Each estimated SI is provided a SI Associated Note in the data base see Inventory Type Group and SI Estimated source code.
