4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. If SI is based on a site curve other than the standard, the curve number is appended to the end of the species, age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. recently logged areas. The SI is based on the method which always produces it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
