4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. The SI is assigned to the dominant or co-dominant leading species, which is indicated in parentheses after the SI. If age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees cannot present, e.g. immature stands. The SI source is the SIBEC program which always provides it. Associated fields in the data base are Inventory Type Group and SI estimated source code.
