4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the Leading Species. Site curves used in the derivation of both age and height, estimated SI is documented for, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees are not present, e.g. young stands (<30yrs). It is denoted by a slash which always follows the SI. Site Index Estimates for Site Series are Inventory Type Group and SI Estimated source code.
