4d SITE INDEX

All SI are known to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the tallest tree in the stand. Site curves are derived from age and height; estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. young stands (<30yrs). It is denoted by a slash which always follows the SI or estimated SI. Codes for SI are Inventory Type Group and SI if estimated source code.
