4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. The SI curve number is used for all tree species, leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. Inventory Type Group 1 (non-forested) and 2 (sparse). The table always provides 6 Associated fields in the data base as the ensloy Type Group and SI Estimated source code.
