4d SITE INDEX

Site Index is the height at the nearest metre referenced at 50 years
(Dominant Height Age - SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when subsection SI was annot present, e.g. young stands (<30yrs). It is denoted by a dash which directly precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
