4d SITE INDEX

All SI are shown by the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. Alternatively the SI cannot be obtained from age and height, if one is unknown, when alter, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. young stands (<30yrs). It is denoted by a slash which always precedes it. A second number refers to the data base inventory Type Group and SI estimated source code.
