4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. Site index curves are from the Vancouver Island Variable Density Yield Project (VDYP) Table 1.
Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX
SI is estimated when suitable SI trees are not present, e.g. Deciduous stands, young stands, or stands where the site index provides it. Associated fields in the data base are the estimy Type Group and SI Estimated source code.
