4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from age and height, estimated SI's shown either, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees aren't present, e.g. Recently logged areas. The source of estimated SI is shown which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
