4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast Height Age. SI is based on the age and height of the dominant trees. If the stand is not old enough to measure from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when no trees SI trees are present, e.g. young stands (<20yrs). It is denoted by a (e) and which always follows the SI number. Where SI data is base, are Inventory Type Group and SI Estimated source code.
