4d SITE INDEX

All SI are shown in the nearest metre referenced at 50 years breast height age. Site index is not applicable to non-vegetated bearing species. Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI in estimated when access to trees cannot be gained present, e.g. (20) indicates estimate (=20yrs). It is denoted by a slash which always precedes it. Associated fields in the data base are inventory Type Group and SI Estimated source code.
