4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present; e.g. young stands (<30 yrs). The SI is derived from the site series which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
