4d SITE INDEX

All SI are shown to the nearest metre reflenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. The source of the SI is recorded in the data base. If age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. young stands. The source of the estimate is also recorded which always precedes the Associated Note in the data base are Inventory Type Group and SI Estimated source code.
