4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years Based on Species, Age, Site Index and Height of the leading species. All SI generated and height derived from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. Immature stands. The SI is shown in brackets which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
