4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years
Breast height age is based on total age and height of the
leading species. When available SI should be obtained from
age and height, estimated SI is shown after,or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. Recently logged areas. The source code is a 4 digit which always provides 4 Accuracy fields in the data base are Inventory Type Group and SI Estimated source code.
