4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant trees in the stand. Site Index and Site Index estimates are inventory age and height, estimated SI is shown after or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated, when suitable SI trees cannot present, e.g. young stands (<30yrs). It is denoted by a slash which always precedes the SI estimate. Estimates are based on Site Series Type Group and SI Estimated source code.
