4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. Where a site index is not available, the leading species, whose site index and curve SI could be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees cannot present, e.g. Mature stands. The SIBEC program estimates SI and also provides it Associated fields in the data base are Inventory Type Group and SI Estimated source code.
