All SI are shown to the nearest metre referenced at 50 years breast height age. Site index curves are those in the Variety Variety booklets. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. deciduous stands. The Type Group and SI Estimated source code provides it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
