- Severe (>30%)
- Moderate (11 - 30%)
- Light (<11%)
- No/Trace Attack
- Recently Harvested

Map Explanation

This map displays MPB attack data in two formats: raw attack data and summarized VRI polygons. The raw attack status data , derived from 30 metre satellite imagery, are displayed in an unprocessed form; areas unaffected by MPB attack will n ot be shaded with a status colour. Attack status and severity are also summarized for whole VRI polygons; non -pine and unaffected portions of the polygon are shaded with the same severity or status colour. Note, because the method of extracting attack information from the satellite imagery has changed, the user will be unable to compare these maps to those created last year (i.e., 2007 version). More detailed project information is available via www.for.gov.bc.ca/hts/rs/mpb_impact /mpb_impact2008 .html.
