MPB Attack Status (Year of Attack)

No Data

No Attack (Recently Harvested)

Red (~2006 - 2007)

New Grey (~2003 - 2005)

Old Grey (~2000 - 2002)

Note: The MPB not attack may overlap areas of grey attack on this attack status map. Typically, these are areas where the attack has occurred in successive stages (e.g. where the beetle has moved from one area of a forest cover polygon to another over a period of time). On the map, lighter red areas indicate not attack over 'the grey', while darker red areas indicate not attack over 'the grey'. Note: only the most recent (2007) severe and very severe red attack has been displayed.
