 - MPB Attack Status (Year of Attack)**
 - No Data
 - No Attack (Recently Harvested)
 - Red (~2006 - 2007)
 - New Grey (~2003 - 2005)
 - Old Grey (~2000 - 2002)

Note: The MPB red attack may overlap areas of grey attack on the attack status map. Typically, these are areas where the attack has occurred in successive years (e.g., where the beetle has moved from one area of forest over a period of time). On the map, grey red areas indicate red attack over 'new grey', while darker red areas indicate red attack over 'old grey'. Note, only the most recent (2007) severe and very severe red attack has been displayed.
